## About us

Greetings to all from Watsoft Technologies.

Watsoft Technologies is a Pune based company committed to create a healthy, environment friendly and cost-effective sustainable future for all. Most of us are concerned about polluted rivers, water scarcity and clean hygienic drinking for all but the reality is that very less has been achieved due to technological deficiencies.

We endeavor to bring innovative technologies together to provide cost effective, affordable and environment friendly solutions in the field of Sanitation, Sewage Treatment, Hard water and Drinking water solutions. Its time to bring scientific innovations with high efficacy which can replace the conventional methodologies which are unable to sustain and achieve desired results so as to make this world a better place to live in.

Watsoft Technologies deals and promotes innovative and cost-effective solutions in following areas.

**Hard water Solutions:** ***Watsoft Electromagnetic and Electro-frequency Water conditioner*** reduces scaling process of hard water with very low operating expenses and zero wastage of water.

**Drinking Water Solutions:** ***Watsoft NMRO (Non-Membrane Reverse Osmosis)*** technology is used to deliver excellent potable water where there is high TDS content in water while reducing the wastage of water in comparison to conventional RO. The unit has a very low operating cost compared to conventional reverse osmosis technology.

**TBF Sewage Treatment Plant:** Efficient and cost-effective sewage treatment plant is the need of the hour and ***Tiger Bio Filter sewage treatment plant*** is the perfect solution for sewage pollution problem which not only delivers good quality water output but it is cost effective and efficient eliminating the Sludge generation and foul odor issues.

We are looking for our mission partners to make this world a better place to live in.
